

**W.W. Williams**  
CONSIDER IT DONE.

# Kinetic PowerPacks

*Power Conditioner, Uninterruptible Power System, and Back Up Power all in one*

## SMALLER FOOTPRINT. BIGGER IMPACT.

Lower overhead, greater efficiency, and higher ROI—without sacrificing reliability.

Kinetic PowerPacks give you back valuable floor space that would otherwise be eaten up by batteries, cooling systems, and extra components. Less grey space (support infrastructure) means more white space (productive space).

## OUR KPP ADVANTAGE

### STANDARD UPS

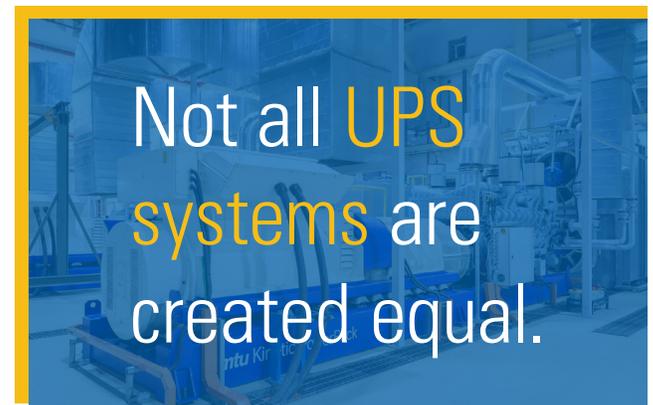

### ▶ KINETIC POWERPACKS

The Kinetic PowerPack's footprint is only 70% of a static UPS setup. That's a 30% grey space savings— **netting more white space** for your data center to generate revenue, not overhead.

## WHY CHOOSE KINETIC OVER STATIC?

When uptime is everything, you need more than just backup power—you need a smarter solution. Kinetic PowerPacks outperform traditional static UPS systems on every front, and maintain your power condition throughout the year.

## THE DIFFERENCE CAN MEAN EVERYTHING.

STATIC UPS	▶ KINETIC POWERPACKS
• Chemical batteries ( <i>weak link</i> )	▶ Kinetic energy storage
• Low power density	▶ High power density
• Requires air conditioning	▶ Natural ventilation
• Shorter lifetime ( <i>10 yrs</i> )	▶ Long lifetime ( <i>25+ yrs</i> )
• Higher cost & waste	▶ Low total cost of ownership

**mtu** has  
changed the  
game for  
sensitive space

## THE BEST IN DYNAMIC UPS TECHNOLOGY

**mtu** Kinetic PowerPacks are part of a cutting-edge solution combining features like a diesel generator and kinetic energy storage in a compact, long-lasting system

### mtu Advantages

- ▶ 25+ year lifetime
- ▶ 10-year overhaul intervals
- ▶ Redundant engine starting
- ▶ No batteries or power electronics
- ▶ Proven reliability in critical environments

Standard is Safe.  
Dynamic is Sustainable.

Standard practices follow the rules.  
Dynamic ones reshape operations and create new opportunities.

## POWER CONDITIONING + GREEN ADVANTAGES

Kinetic PowerPacks aren't just powerful—they're smart and sustainable.

- ▶ Active rotating filter built in
- ▶ No batteries = no toxic waste
- ▶ No air conditioning = reduced energy use
- ▶ UTI Tier III & IV certified
- ▶ LEED Platinum certified

AUTHORIZED DISTRIBUTOR FOR

W.W. Williams is proud to offer **mtu** Kinetic PowerPacks—engineered for efficiency, longevity, and unshakable reliability. Let us help you power your future.
